18650/2600
Lithium-ion 18650 battery, protected, 2600 mAh

PROTECTED: The integrated safety board protects the cells against overload, short circuit and deep discharge, so the battery is better protected against incorrect usage, which guarantees a longer lifetime without worries.
VERSATILE: Perfect for use in a wide range of high power devices.
DURABLE: Low self-discharge and good for many charging cycles. Because of the low self-discharge, the battery will keep its energy for a long time, even when not in use

3.7 V rechargeable Lithium-ion 18650 battery

Provides long lasting energy with very low self-discharge

Integrated protection PCB protects against overload, short circuit and deep discharge

Suitable for use in e.g. LED torches, laser pens, etc.

Note: because of the protection PCB the battery is approx. 3 mm longer than most unprotected 18650 Li-Ion batteries.
