

Univerzalni auto punjač za laptop, 80W

Šifra: 84705

Kategorija proizvoda: UPS, elektro zaštita, punjači

Proizvođač: Nedefinisan1

Cena: **1.810,00**

- Ovaj DC adapter velike snage je dizajniran da napaja laptopove popularnih brendova koji zahtevaju
- DC ulaz od 15V do 24V dok putujete u automobilu.
- Adapter ima zaštitu za preopterećenje i kratak spoj.
- Ulaz: DC 11-14V
- Izlaz: za DC 15/16/18/19/20V 4A max; za DC 22/24V 3.3A 80W max
- Težina: 160 g

AUTO DC POWER REGULATED ADAPTOR

This high power DC adaptor is designed to power the popular brand notebook computers which require DC input from 15V to 24V while you are traveling in the car. The adaptor features overload and short circuit protection to protect it from damage.

For use with most:

12 volt DC

- Stabilized output, low ripple, low interference
- Adjustable output voltage
- High efficiency & low energy consumption
- Power LED monitor

NOTE: The adaptor is not recommended for use with any device that requires a regulated DC input.

OPERATING INSTRUCTIONS:

Voltage selection

1. Determine proper output voltage setting. Check rating plate and the voltage indication marked next to the input jack on your computer. You may find the voltage in your AC adaptor or in the Computer user's manual.

2. Set the voltage switch on the adaptor in the proper voltage.

TIP polarity selection

1. Determine proper connector size. As the tip is aptitude. The positive tip polarity tip is always as following.

2. Insert connector output plug into your computer.

3. Insert adaptor into vehicle lighter socket. Green LED will light to indicate proper operation. If LED fails to light. See FUSE REPLACEMENT.

4. Turn on computer. If it does not operate, immediately disconnect and review the above steps.

FUSE REPLACEMENT:

To check or replace fuse, simply rotate the plastic tip at the end of adaptor counterclockwise.

Visually inspect fuse element. If blown or if you are unsure, replace fuse(10AMP).

SPECIFICATION:

INPUT: DC 11 - 14 Volts

OUTPUT: DC 15/16/18/19/20V 4A max

DC 22/24V 3.3A 80W max

Fuse for overload protection(10 AMP)
