	Notes	<p>Performance figures are obtained from testing conducted with the device fully populated with drives, with their default memory configuration, and under a continuous recording setup. Actual system capabilities may vary based on configuration, drive performance, enabled features, and the presence of additional workloads.</p> <p>Use NVR Selector to quickly find a suitable model based on your requirements.</p> <p>The number of streams that can be viewed simultaneously is twice the suggested maximum number of cameras. For example, if the suggested maximum number of cameras for a model is 10 under H.264, 1080p, the model can support up to 20 streams of the same specification at the same time.</p>
Synology Drive	Recommended Number of Concurrent Sync Clients	350 (the number of connections that can be maintained when the recommended number of hosted files was reached)
	Recommended Number of Hosted Files	5,000,000 (applies to files indexed or hosted by Synology Drive . For file access through other standard protocols, refer to the File Services section above)
	Notes	<p>Exceeding the recommended numbers above will not block application operations, but may result in longer response time.</p> <p>Utilizing SSD cache can significantly improve performance.</p> <p>Btrfs file system and non-encrypted shared folders were used during the aforementioned testing.</p>
Synology Office	Suggested Users	3,000

	Notes	Suggested users is derived from testing in an environment with 60% idle users (each logging in and viewing documents) and 40% active users (each executing random actions at intervals of 20 to 40 seconds) operating within documents, each document having 30 users.
