| | Notes | <p>Performance figures are obtained from testing conducted with the device fully populated with drives, with their default memory configuration, and under a continuous recording setup. Actual system capabilities may vary based on configuration, drive performance, enabled features, and the presence of additional workloads.</p> <p>Use NVR Selector to quickly find a suitable model based on your requirements.</p> <p>The number of streams that can be viewed simultaneously is twice the suggested maximum number of cameras. For example, if the suggested maximum number of cameras for a model is 10 under H.264, 1080p, the model can support up to 20 streams of the same specification at the same time.</p> |
| Synology Drive | Recommended Number of Concurrent Sync Clients | 350 (the number of connections that can be maintained when the recommended number of hosted files was reached) |
| | Recommended Number of Hosted Files | 5,000,000 (applies to files indexed or hosted by Synology Drive . For file access through other standard protocols, refer to the File Services section above) |
| | Notes | <p>Exceeding the recommended numbers above will not block application operations, but may result in longer response time.</p> <p>Utilizing SSD cache can significantly improve performance.</p> <p>Btrfs file system and non-encrypted shared folders were used during the aforementioned testing.</p> |
| Synology Office | Suggested Users | 3,000 |

| | | | |
|----------------------------|---------------------|---|---|
| | Notes | Suggested users is derived from testing in an environment with 60% idle users (each logging in and viewing documents) and 40% active users (each executing random actions at intervals of 20 to 40 seconds) operating within documents, each document having 30 users. Learn more | Client performance may affect maximum simultaneous editing users. Client PCs used for testing: Intel Core i3-3220 / 8GB RAM |
| VPN Server | Maximum Connections | 40 | |
